

**VACANCY**

The Institut Laue-Langevin (ILL), situated in Grenoble, France, is an international centre for scientific research. It is Europe's leading facility for neutron research and receives over 2000 visiting scientists per year, attracted to the centre to carry out world-class research.

Is this new challenge in an international research centre for you?

We're currently looking for a:

## **Health and Safety Technician (M/F)**

**Duties:**

Your principal duties, to be shared in part with the ILL safety engineers, will be to:

- carry out the installation procedures for new ILL jobsites and monitor safety conditions throughout the life of the jobsite
- obtain and install signage for the jobsites and experimental devices
- carry out safety visits, including, in particular, the systematic monthly visits or those performed with the Workplace Health and Safety Committee (CHSCT)
- ensure the correct display of risk notices in the workplace and maintain the risk database,
- check the condition of the work-at-height personal protective equipment upon loan
- assist with the monitoring of mobile fire loads,
- monitor the on-site transport of materials classed as dangerous by European transport regulations,
- handle and/or transport conventional waste (use of lift trucks),
- accompany and assist safety service suppliers during their work on the ILL installations (regulatory hazard controls - lightning, legionella, fume cupboards, etc.).

**Qualifications and experience:**

- You must hold a NVQ level 4 in environmental safety or equivalent, with some experience and/or a keen interest in this field of activity.
- We are looking for someone with the skills required to collect data and ensure their traceability, to identify risks and notify as necessary, and to run awareness-raising activities on safety at work.
- You should be recognised for your experience on the ground and ability to interact constructively in your work, despite a very firm and rigorous approach to ensuring compliance with safety regulations.

**Language skills:**

As an international research centre we are particularly keen to ensure that we attract applicants from outside France. You must have a good command of both French and English. Knowledge of German would be an advantage.

**Notes:**

This is an indefinite-term contract.

Industrial lift truck certification is required.

**You must be medically fit for work under ionising radiation.**

**How to apply:**

Please submit your application before **14/10/2018** via our website: <https://www.ill.eu/en/careers/> (Ref.: 18/41).

*The ILL is committed to equal opportunities and diversity and encourages anyone with the appropriate qualifications to apply.*
