VACANCY

The Institut Laue-Langevin (ILL), situated in Grenoble, France, is Europe's leading research facility for fundamental research using neutrons. The ILL operates the brightest neutron source in the world and hosts over 2000 visits by scientists per year, who come to carry out world-class research in a wide variety of scientific fields. Funded primarily by its three founder members: France, Germany and the United Kingdom, the ILL has also signed scientific collaboration agreements with 10 other countries. We currently have a vacancy for a:

Deputy Head of the Health Physics, Safety and Environment Service (SRSE)

Duties:

The Health Physics, Safety and Environment Service (SRSE - *Service Radioprotection Sécurité Environnement*) reports directly to the Director of the ILL. Its role is to provide advice on the application of legislation and on the management of the ILL's prevention policies in the areas of conventional safety and health physics. Its duties also involve monitoring and supervising all the installations on behalf of the Director. In addition, it is responsible for the statutory monitoring of radioactivity in the environment, the management of ILL's conventional and nuclear waste, and for nuclear decontamination operations.

As Deputy to the Head of the SRSE, your main duties will be to:

- help to define SRSE strategy and follow up any action taken
- coordinate and support the activities of the various operational groups within the SRSE in their respective areas
- draft technical reports and carry out studies/projects.

For questions regarding the activities of the service, you may also be required to act as:

- contact person for relations with inspection bodies (labour inspectorate (DIRECCTE), nuclear safety authority (ASN), IRSN (Institute for Radiation Protection and Nuclear Safety))
- communications contact point for the SRSE with outside organisations, such as the CLI (*Commission Locale d'Information*), which informs the local population on nuclear safety and radiation protection matters.

In addition, you will deputise for the Head of the SRSE in his absence.

Qualifications and experience:

- Master's degree in engineering and at least 10 years' professional experience in radiation protection and the management of operational teams.

Special skills required:

- Excellent writing skills in French
- Excellent communication skills and the ability to make technical decisions
- Knowledge of French legislation on radiation protection and conventional safety
- Certification as a "PCR" (*Personne Compétente en Radioprotection* or "competent person" in radiation protection) would be an advantage.

Language skills:

As an international research centre, we are particularly keen to ensure that we also attract applicants from outside France. You must be fluent in French and have a sound command of English. Knowledge of German would be an advantage.

Notes:

This post is a permanent position.

Medical fitness for work under ionising radiation is required.

Benefits:

Generous company benefits (expatriation allowance), relocation assistance and language courses may be offered (for more information, please consult our [employment conditions](#)).

How to apply:

Please submit your application on line, no later than **05/08/2018**, via our website: www.ill.eu/en/careers (vacancy reference: **18/24**). **The interviews will take place beginning of September.**

We are committed to equal opportunity and diversity; we therefore encourage anyone with relevant qualifications to apply.
